

Mohamed Ali Aoun

AI & Data Science Student

mohamed-ali.aoun@dauphine.eu | LinkedIn | +216 50 234 707

AI & Data Science Master's student with hands-on, end-to-end experience: designing and shipping GenAI systems (LLM, RAG, agents) to production with real software rigor (APIs, Pydantic, asyncio), data analysis and reporting (SQL, Power BI), and coordinating projects across multiple stakeholders. Seeking an end-of-studies internship to contribute to a data & AI team's initiatives, in France or internationally.

EDUCATION

Université Paris Dauphine–PSL | Tunis 2025 – Present

Master's Degree in Artificial Intelligence & Data Science - (Top of class)

Selected coursework: Generative AI, Natural Language Processing, Deep Learning for Image Analysis, Optimization for Machine Learning, Monte Carlo Search & Games, Knowledge Graphs, Data Analysis, Statistical Learning, Time Series, Data Mining.

Institut Supérieur d'Informatique El Manar 2021 – 2024

Bachelor's Degree in Computer Science

PROFESSIONAL EXPERIENCE

Kin'Yu Consulting | AI Engineer – Oracle Cloud June 2026 – Sept. 2026

- Built **LAWAI**, an end-to-end document verification and understanding pipeline for Tunisian law firms on Oracle Cloud Infrastructure, automating OCR and structured extraction across Tunisian legal document types.
- Engineered the extraction layer on OCI Document Understanding and OCI Generative AI, applying a provider/factory pattern with Pydantic schemas and a per-document-type schema architecture; eliminated prompt drift across document types.
- Developed OCI Integration flows and agentic workflows to automate processing end to end, and connected them to the client-facing Oracle APEX application, backed by Oracle Database 26ai (documents & extractions tables, status state machine, JSONB payloads, versioning).

Oracle Cloud Infrastructure, OCI Document Understanding, OCI Generative AI, Oracle APEX, OCI Integration, Oracle Database 26ai, Python, Pydantic

VistaDeep | AI Engineer (Freelance) May 2026 – July 2026

- Built a supply chain risk intelligence assistant with a multi-agent architecture (Events, Index, Report, Formulation): a hand-rolled Python orchestrator with an LLM-based router (direct OpenAI API calls, JSON-mode agent selection) and a keyword-based fallback, running selected agents concurrently via asyncio. Data retrieval via Text-to-SQL against PostgreSQL (Supabase, read-only role), with executions traced to a dedicated table for monitoring and debugging.

Python, OpenAI API, asyncio, PostgreSQL (Supabase), Text-to-SQL, Multi-Agent

Opus Lab | AI Instructor Aug. 2026 – Sept. 2026

- Designed and delivered a hands-on AI development bootcamp for students aged 15–19 with no coding background, teaching LLM and prompt-engineering fundamentals and guiding each student to build their first chatbot and first AI agent.

UmanLink Digital Service | AI Software Developer Sept. 2024 – Mar. 2025

- Developed LLM- and RAG-based solutions that automate complex business processes, turning raw data into a driver of operational productivity.
- Call-Center Analytics Tool:** full-stack app (Python back-end, Flask interface) with automated pipelines for cleaning, processing and visualizing data, surfacing call-failure causes and the best times to call customers back; 40+ hours saved per month. (Python, Flask, Pandas, NumPy, Matplotlib, Plotly)
- E-commerce Chatbot:** multi-agent assistant for product search, order tracking and FAQ handling over a vector database and RAG, lifting conversion and offloading support. (Python, LangChain, GPT-4, Multi-Agent, Text-to-SQL)

Medianet | Data Science Intern Feb. 2024 – Jul. 2024

- Built an AI-powered SEO reporting platform (data analysis, dashboarding and AI-generated summaries) that cut processing time from several days to about 3 minutes (>90% reduction), applying NLP with 97% accuracy. (Python, NLP, GPT-3.5, Web Scraping, BeautifulSoup, Power BI)

Croki (Startup) | Co-Founder Sept. 2023 – Sept. 2025

- Co-founded an EdTech startup in a non-technical role, owning operations, logistics, recruitment, and product delivery.

LEADERSHIP & PROJECT MANAGEMENT

Enactus ISI | Vice-President Finance & Pitching Lead Sept. 2021 – Jul. 2024

- Managed the budget for social-entrepreneurship projects, organized events gathering 500+ students, coordinated planning across multiple project teams, and represented the team at Enactus national and international competitions.

PERSONAL PROJECTS

FIFA World Cup 2026 - Match & Tournament Prediction Engine

- Built a probabilistic prediction system combining a Dixon-Coles model with XGBoost, running Monte Carlo tournament simulations and a dedicated penalty-shootout model to estimate match outcomes and title odds; documented on LinkedIn.

Python, XGBoost, Dixon-Coles, Monte Carlo Simulation, pandas, scikit-learn

TECHNICAL SKILLS

Data & Reporting: SQL, Power BI, MySQL, MongoDB, PostgreSQL, Vector Databases

AI / ML: RAG, LLM Applications, Prompt Engineering, NLP, Multi-Agent Systems, Text-to-SQL, Machine Learning, Statistical Learning, XGBoost, Monte Carlo Simulation

Languages & Frameworks: Python (primary), FastAPI, Pydantic, asyncio, LangChain, R, Java, C, SQL, Git, Streamlit, OpenCV, BeautifulSoup, Supabase

Cloud & Oracle: Oracle Cloud Infrastructure, OCI Document Understanding, OCI Generative AI, Oracle APEX, OCI Integration, Oracle Database 26ai

LANGUAGES

Arabic - Native | French - Professional | English - Professional
